

Amerigroup Washington, Inc. selected by the Washington State Health Care Authority to provide integrated managed care (IMC) and behavioral health expertise to members

Amerigroup Washington, Inc. was selected by the Washington State Health Care Authority to provide integrated managed care (IMC) and behavioral health expertise to Medicaid members residing in Salish, Great Rivers and Thurston-Mason regions. Salish, Great Rivers and Thurston-Mason regions will go live on January 1, 2020, with IMC.

Once this implementation is complete, Amerigroup will be a statewide IMC managed care organization. This will allow Amerigroup to coordinate IMC services as well as provide specialized value-added benefits to our members. We look forward to continuing to partner with community providers and stakeholders to ensure the transition to IMC goes smoothly and members do not experience gaps in care. For more information about services offered by Amerigroup, please visit <https://providers.amerigroup.com/WA>.
